Abstract

This is an example of an abstract in a paper. This is an example of an abstract in a paper. This is an example of an abstract in a paper. This is an example of an abstract in a paper.This is an example of an abstract in a paper.This is an example of an abstract in a paper.

1 Exploring Data

1.1 Univariate plots

This is a section. I will use a footnot now [1]. I will soon use cross-ref.I will soon use cross-ref.I will soon use cross-ref.I will soon use cross-ref. I will soon use cross-ref. I will soon use cross-ref.I will soon use cross-ref.I will soon use cross-ref.I will soon use cross-ref.I will soon use cross-ref. I will soon use cross-ref. I will soon use cross-ref.

I will soon use cross-ref.I will soon use cross-ref: as we see in Figure 1, thta is an ugly barplot.

Figure 1: Worst barplot

But, in Figure 2 you may see something even worse.

I am doing my best, as recommended in Magallanes Reyes (n.d.), and Leisch and Team (n.d.).
---

[1] This is a footnote.

Figure 2: Worst histogram

1.2 Bivariate plots

I only have this ugly one:

I am doing my best, as recommended in Magallanes Reyes (n.d.), and Leisch and Team (n.d.).

1.3 Complex plots

I just prepare a map. See it below.

2 Conclusion

Still so much to learn. But, I am doing my best, as recommended in Magallanes Reyes (n.d.), and Leisch and Team (n.d.).
Figure 3: Worst histogram
